Ureterocystoscope by Caspar

Berlin 1896

1886 Professor Max Nitze develops the first „modern“ cystoscope (international patent) in Berlin. Continued cooperation in the field of endoscopy with the instrument makers L. & H. Loewenstein.

1906 Establishment of Georg Wolf GmbH Berlin and their outstanding patents:

- Instrument for insight into body cavities (1923)
- Bending Gastroscope (1930)
- First photocystoscope with blue light illumination (1937)

1948 The company Georg Wolf GmbH Berlin is state-owned.

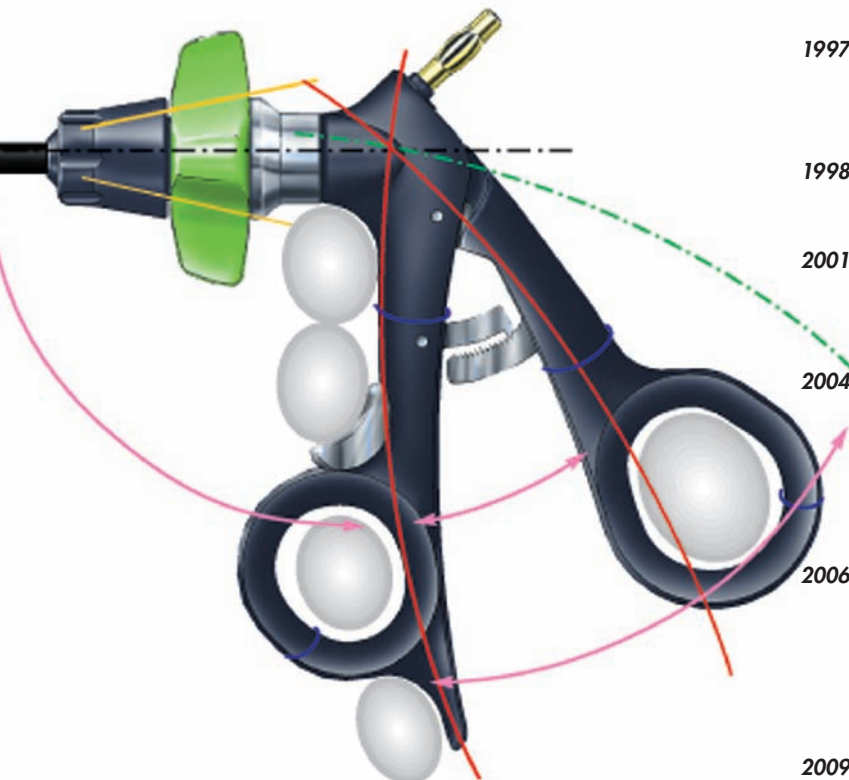

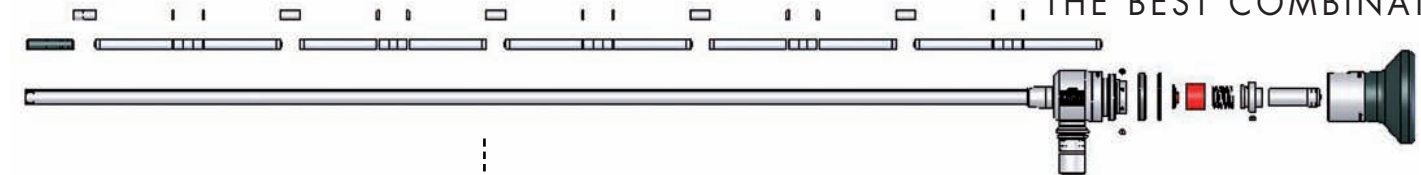

1957 Renaming in VEB Secura: industrial manufacture of respiration bronchoscope by professor H. Friedel.

1961 Restructuring into VEB MGB: Market leader in East Europe for endoscopy.

1990 Reprivatization of the company: MGB Medizinische Geräte GmbH Berlin.

KNOW HOW & TRADITION 1886-TODAY

THE BEST COMBINATION

1992 Alliance with Carl Zeiss Corporation: a new generation of endoscopes is developed.

1997 Establishment of *MGB Endoskopische Geräte GmbH Berlin*; an enterprise of the Medison group (Medison Co., Ltd., Seoul, Korea).

1998 Foundation of MGB Endoscopy Co., Ltd., Seoul, Korea.

2001 Daewoong Pharmaceutical Co., Ltd., Seoul, became a shareholder of MGB. The alliance with the Asian market strengthens MGB's position.

2004 *Bionet Co., Ltd., Seoul*, became shareholder too and MGB was appointed as Bionet's European/African representative. Bionet is a leading company for biosignal products such as Cardiographs, Fetal- and Patient-Monitors.

2006 *Promed Supply Company Ltd., Hongkong*, became an additional shareholder and appointed MGB as their European/African representative. Promed is a fast growing manufacturer of consumables for surgery and endoscopy.

2009 MGB is the official European representative of ACCESS Instruments, subsidiary of SSI, Specialty Surgical Instrumentation, USA.

MGB is a global acting medical device manufacturer. The Berlin facility specializes in design and manufacturing of optics, precision mechanics and micro systems. MGB offers a full product line of rigid endoscopy standards as well as customized solutions.

In partnership with Bionet and Promed, MGB is able to offer complete solutions for a wide range of medical devices including digital electronics as well as consumables. Promed offers the complementary disposable accessories. Bionet's product line contains a complete solution for bio-signal-monitoring.

MGB and associated companies search continuously for innovations with benefits for both users and patients. The extraordinary network of R&D partners allows the development of products with unique features.

SUCCESS WITH HIGH QUALITY

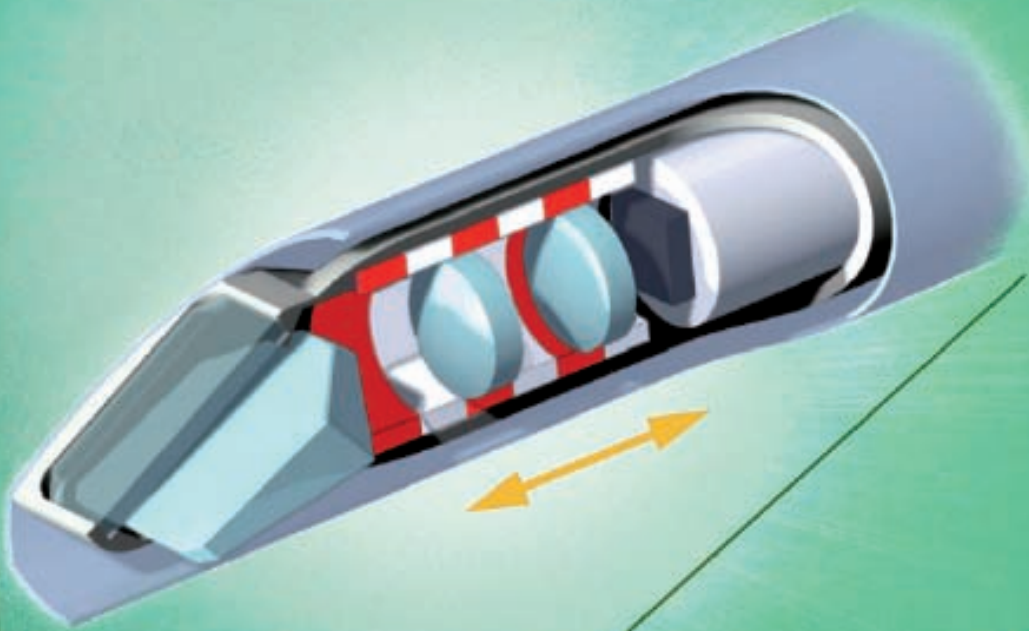

EXPERIENCED QUALIFIED HUMAN RESOURCES

The experience in design and manufacturing of precision mechanics and optics since more than 111 years provides the fundament for MGB's high end products. The opportunity to offer unique products with best quality for reasonable price requires continuously improvement of design and manufacturing process. The combination of best practise and innovation.

MGB Berlin is investing continuously in future technologies like micro systems, micro machining and optics. MGB is focussing on high definition imaging systems, future diagnosis and therapy procedures like optical biopsy. Our long term vision follows the trend of minimal invasive medicine. Close co-operation with universities, independent research institutes and industrial partner guarantees the progress of the art. Any technical edge is controlled by certified process management. The newest harmonized international standards are always applied.

OUR SERVICE WORLDWIDE

TECHNICAL EDGE AND SERVICE GUARANTEE CUSTOMER'S SATISFACTION

Are you interested in the best offer? Would you like to know which products fit your client's request? Customer's satisfaction has the highest priority in MGB. We are always providing our best service to all our partners all over the world at any time. You are welcome to attend our sales workshops as well as individual sales trainings at your location. If you need assistance to prepare quotations or tenders, *please don't hesitate to contact our sales team.*

MGB trains the service engineers individually in order to satisfy customers who use MGB equipment. If you prefer to exchange your experience with other MGB clients? *Please ask for our annual service workshops.*

MGB has joined an international network of leading companies in medical device manufacturer's society.

BIONET manufactures cardiographs, patient monitors and fetal monitoring systems.

PROMED manufactures consumables for surgery as well as high frequency surgery equipment. The network has established One Stop Agency.

MGB is able to offer complete solutions for individual customer requirements.
